

Zapcode For GoldMine

Zapcode is now more closely integrated with GoldMine for even more convenient and intuitive use by office and field based personnel. Zapcode for GoldMine has been developed to provide greater functionality than earlier versions with a far more 'user-friendly' look and feel.

Enter an UK postcode and Zapcode for GoldMine returns the address up to street level from the Rapid Address File (RAF). All the user has to do then is key-in either the house number or building name. With large user postcodes, Zapcode for GoldMine will return a complete address including the organisation name. Zapcode for GoldMine reduces data entry time by dramatically cutting the number of keystrokes needed to capture an accurate address.

FEATURES AND BENEFITS

Zapcode For GoldMine:

- Contains a new, simplified and user-friendly Windows interface.
- Provides rapid address capture (postcode to address).
- Contains a new partial postcode search option.
- Contains a 'new for old' automatic postcode update facility.
- Contains the Rapid Address File (RAF) of 1.7 million postcodes.
- Fully integrated into GoldMine - It is compatible with GoldMine 4.0, GoldMine Enterprise, GoldMine 5.0, GoldMine 6.6 and GoldMine Corporate Edition.
- Has been fully tested on dBase, Oracle 7.3, Oracle 8i, Interbase 4.5, MS SQL 6.5 and MS SQL 7.

TECHNICAL FEATURES

- Runs on Windows 95, 98, 2000, Me, XP, NT4, and Server 2003.
- Compact database of only 11MB.
- Quarterly database updates.

Designed for
GoldMine

Zapcode for GoldMine returns the address up to street level from the Rapid Address File (RAF).
